**MUKAVA FOR GUARDIANS**

Mukava for guardians

Mukava is a simple, safe service that is easy to use with your web browser (mobile or desktop). Your Mukava user ID is your own phone number. When you start using the service, you will receive a text message containing your password.

The user interface for guardians enables direct access to the day care services. Guardians can update their personal information and information related to their children. Among other things, it is possible to add information on persons authorised to pick children up from day care. Easy and safe.

Guardians can receive photos and messages, and they can discuss matters related to the care of their child directly with the educators.

With the calendar function, providing information on day care requirements and related follow-up is very simple.

Features

✓ Updating information related to children

✓ Updating information related to guardians
